Awesome chill game to play with friends!. A rather cheap game with poor graphics and gameplay. Basically you run around a large map collecting gear and weapons as well as supplies to repair and fuel the various vehicles laying around the map. Along with that you can squad up with other players or just fight everyone and you have to escape the island with briefcases that have been scattered around the map.

I have to say that both the sprinting and hunger ideas they put into the game suck. The sprinting looks completely unrealistic to other players that see it and there's not nearly enough food to prevent hunger damage.

The one main thing that kills this game though is the serious lack of players. Most of the time I search for a server there isn't even one to play on, this game just never "took off" and it's been dead for a long time now.. This is a nice cute little game of hide and seek tag as bears and silly monsters, grab a beer and go ham.. This game rocks. If you like Contra and you like rock...then buy it.. Very good game.. Bought because a friend recommended it. I have to say I am surprised how much I have enjoyed it, especially the multiplayer aspect. I recommend anyone try this game out and I am excited to keep playing.. Basically, a cheap version of clicker heroes. The only noticeable difference for me is the character names. If you have clicker heroes, do not bother getting this game. It is an exact copy.

EDIT: Apparently, according to some guy who commented on my review, my opinion is "wrong", so feel free to ignore this review. Makes no sense to me but that's life. Some people are just there to wind others up I guess.. Such a nice game, such a nice soundtrack, such beautiful weapons, such a silly story, I loved it.

Now uses Steamworks for online which is perfect ♥. Great game, highly recommended!
